Plant and Soil

INTERNATIONAL JOURNAL OF PLANT NUTRITION,
PLANT CHEMISTRY, SOIL MICROBIOLOGY AND
SOIL-BORNE PLANT DISEASES

VOLUME 50

THE HAGUE
MARTINUS NIJHOFF
1978

PRINTED IN THE NETHERLANDS

CONTENTS—TABLE DES MATIERES—INHALT

PAGE

M. S. AULAKH and G. DEV, Interaction effect of calcium and sulphur on the growth and nutrient composition of alfalfa (*Medicago sativa* L. Pers.), using ^{35}S 125

J. C. BAJAJ and REHANUL HASAN, *Short communication.* A laboratory method for assessment of nitrogen availability in soils . 709

R. T. BESFORD, Effect of potassium nutrition of three tomato varieties on incidence of blossom-end rot 179

R. T. BESFORD, Effect of replacing nutrient potassium by sodium on uptake and distribution of sodium in tomato plants 399

R. T. BESFORD, Effect of sodium in the nutrient medium on the incidence of potassium-defidiency symptoms in tomato plants . 427

WILLIAM L. BIGG and T. M. DANIEL, Effects of nitrate, ammonium and pH on the growth of conifer seedlings and their production of nitrate reductase 371

GRAEME J. BLAIR and SANTOS CORDERO, The phosphorus efficiency of three annual legumes 387

ROBERT M. BODDEY, PETER QUILT and NAZEER AHMAD, Acetylene reduction in the rhizosphere of rice: methods of assay 567

R. R. BROOKS, R. S. MORRISON, R. D. REEVES and F. MALAISSE, *Short communication.* Copper and cobalt in African species of *Aeolanthus* Mart. (Plectrantinae, Labiatae) 503

CONRAD S. BRUMLEY and RONALD E. SOSEBEE, Influence of soil temperature on niacin and thiamine in honey mesquite 13

R. P. S. CHAUHAN and S. L. POWAR, Tolerance of wheat and pea to boron in irrigation water 145

SANTOS CORDERO and GRAEME J. BLAIR, The effects of lime-pelletting and lime-superphosphate fertilizer on the growth of three annual legumes in an acid sandy soil 257

P. DABIN, E. MARAFANTE, J. M. MOUSNY and C. MYTTENAERE, Absorption, distribution and binding of cadmium and zinc in irrigated rice plants 329

J. D. DEANS and R. MILNE, *Short communication.* An electrical recording soil moisture tensiometer 509

R. S. DWIVEDI and D. K. ARORA, *Short communication.* Hyphal interactions among some soil fungi 717

M. EL BALKHI et HOANG G. DIEM, *Short communication.* Estimation du potentiel d'inoculum de *Pyrenochaeta lycopersici* Gerlach and Schneider dans divers sols de serre en relation avec les précédents culturaux 705

M. A. ELRASHIDI and S. LARSEN, The effect of phosphate addition on the solubility of phosphate in soil 585

J. R. ETHERINGTON and M. S. DAVIES, *Short communication.* Analysis of iron in organic materials: an unrecognized problem of volatility 497

A. A. FRANCO, J. R. R. PERES and M. NERY, The use of *Azobacter Paspali* N_2-ase (C_2–H_2-reduction activity) to measure molybdenum deficiency in soils 1

F. GANRY, G. GUIRAUD and Y. DOMMINGUES, Effect of straw incorporation on the yield and nitrogen balance in the sandy soil-pearl millet cropping of Senegal 649

RAMESH R. GITTE, P. VITTAL RAI and R. B. PATIL, Chemotaxis of *Rhizobium* sp. toward root exudate of *Cicer arietinum* L. . . . 553

K. M. GOH and K. K. KEE, Effects of nitrogen and sulphur fertilization on the digestibility and chemical composition of perennial ryegrass (*Lolium perenne* L.) 161

C. J. GRAVES, P. ADAMS, G. W. WINSOR and M. H. ADATIA, Some effects of micronutrients and liming on the yield, quality and micronutrient status of tomatoes grown in peat 343

GILLES GUERRIER, Absorption d'aluminium par des racines de plantes entières de féveroles et de lupin jaune 135

R. C. GUTTERIDGE, *Short communication.* Iron deficiency in pasture species on coralline rubble soils 489

M. HERLIHY, Dry matter response of ryegrass to ammonium and nitrate sources of nitrogen as a function of soil texture and moisture 635

M. HOCHBERG and N. LAHAV, *Short communication.* Movement of iron and zinc applied as EDTA complexes in soil columns . . 221

W. J. HORST and H. MARSCHNER, Effect of silicon on manganese tolerance of bean plants (*Phaseolus vulgaris* L.) 287

R. E. HUNTER, J. A. VEECH, J. M. HALLOIN and W. W. CARTER, *Short communication.* Exudation of terpenoids by cotton roots . 237

J. L. M. HUNTJENS and R. A. J. M. ALBERS, A model experiment to study the influence of living plants on the accumulation of soil organic matter in pastures 411

V. ISWARAN, V. D. PATIL and ABHISWAR SEN, Effect of spray of the culture of a bacterium from the phyllosphere of water hyacinth (*Eichornia crassipes* Mort Solms) on the yield of paddy and wheat 253

B. T. KANG, Effect of some biological factors on soil variability in the tropics III. Effect of macrotermes mounds 241

H. KIANMEHR, *Short communication.* The response of *Helianthemum chamaecistus* Mill. to micorrhizal infection in two different types of soil 721

H. KLEIN and H. J. JÄGER, Some aspects of relation between nitrogen metabolism in *Pisum sativum* and mineral nutrition . . 25

I. KOVANCI, H. HAKERLERLER and W. HÖFNER, Ursachen der Chlorosen an Mandarinen (*Citrus reticulata* blanco) der ägäischen Region 193

Y. LESHEM and I. LEVIN, The effect of growing alfalfa on subsequent cotton plant development and on nitrate formation in peat soil 323

I. LEVIN and Y. LESHEM, Using forage crops to reduce nitrate accumulation in hula peat soils 419

D. J. LINEHAN, The uptake by plants of polymaleic acid: a polycarboxylic acid structurally related to those of soils 627

D. J. LINEHAN, Humic acid and iron uptake by plants 665

W. H. MCKEE Jr., Slash pine seedling response to potassium and calcium on imperfectly drained coastal plain soil 617

H. R. MANCHANDA and O. P. YADAV, *Short communication.* Effect of boron application on barley in a sierozem sandy soil 713

K. R. MIDDLETON and G. S. SMITH, The concept of a climax in relation to the fertilizer input of a pastoral eco-system 597

L. M. MUGWIRA, S. M. ELGAWHARY and S. U. PATEL, Aluminium tolerance in triticale, wheat and rye as measured by root growth characteristics and aluminium concentration 683

G. S. MURTHY and D. J. BAGYARAJ, *Short communication.* Rhizosphere microflora of *Cajanus cajan* in relation to Fusarium wilt resistance 485

S. K. NAIR, *Short communication.* Infestation of legume root nodules by a chloropidan larva 493

GUSTAVO A. ORIOLI and NÉSTOR R. CURVETTO, The effect of fire on soil humic substances 91

JAMES E. PALLAS Jr. and J. BENTON JONES Jr., *Short communication.* Platinum uptake by horticultural crops 207

MICHAEL J. POTTS, *Short communication.* The pattern of deposition of air-borne salt of marine origin under a forest canopy. . . . 233

R. K. RAJOO and C. P. GHANSIKAR, *Short communication.* Herbicidal influence on the uptake of phosphorus by paddy (*Oryza sativa* L.) and maize (*Zea mays* L.) 479

ARIELLA RAVEH and YORAM AVNIMELECH, The effect of drying on the colloidal properties and stability of humic compounds . . 545

CH. RICHTER, F. VAN DER POL and A. MARLIERE, *Short communication.* A negative influence of manure on calcareous soils. . . 515

JUDITH A. ROSEN, CARL S. PIKE, MARC L. GOLDEN and JACOB FREEDMAN, Zinc toxicity in corn as a result of a geochemical anomaly 151

K. L. SAHRAWAT, Evaluation of chelating compounds and carbofuran for inhibiting nitrification in soils 521

A. A. SALARDINI, Yield response of tea (*Camelia sinensis*) to fertilizer and irrigation in two locations of Iran 113

S. U. SARATCHANDRA, Nitrification activities and the changes in the populations of nitrifying bacteria in soil perfused at two different H-ion concentrations 99

M. A. SCAIFE and D. T. CLARKSON, *Short communication.* Calcium-related disorders in plants – a possible explanation for the effect of weather 725

B. N. SHINDE, P. A. SARANGAMATH and S. PATNAIK, Efficiency of HCl and H_2SO_4 acidulated rock phosphates for rice (*Oryza sativa* L.) on acid soils 575

ERIK SIBBESEN, An investigation of the anion-exchange resin method for soil phosphate extraction 305

BIJAJ SINGH, K. N. SHARMA and D. S. RANA, The quantity-intensity relations of potassium in soils from plots having nine fixed crop rotations for six years 363

B. K. SINGH and S. C. MODGAL, Dry-matter production, phosphorus and potassium uptake as influenced by levels and methods of nitrogen application in rainfed upland rice 693

R. A. SINGHANIA and N. N. GOSWANI, Transformation of applied phosphorus in soils under rice-wheat cropping sequence . . . 527

K. SITARAMAIAH and R. S. SINGH, Effect of organic amendment on phenolic content of soil and plant and response of *Meloidogyne javanica* and its host to related compounds 673

J.-Y. STANDAERT, H. MARAITE, C. MYTTENAERE et J. A. MEYER, Etude de l'influence de la concentration saline et du rapport sodium/calcium du milieu nutritif sur la sensibilité de la tomate à la fusariose vasculaire 269

V. T. TADROS andJ. W. McGARITY, *Short communication.* A procedure for securing large and undisturbed soil cores for field simulation studies 213

B. VENKATESWARLU, T. Y. MADHULETY and A. V. RAO, Contribution of organic matter, N and P through roots and stubbles in irrigated rice culture 537

J. W. L. VAN VUURDE, The rhizosphere microflora of wheat grown under controlled conditions I. The effect of soil fertility and urea leaf treatment on the rhizoplane microflora 447

J. W. L. VAN VUURDE and A. DE LANGE, The rhizosphere microflora of wheat grown under controlled conditions II. Influence of the stage of growth of the plant, soil fertility and leaf treatment with urea on the rhizosphere soil microflora 461

J. W. L. VAN VUURDE and A. E. G. TONNEYCK, *Short communication.* Effect of foliar application of urea on wheat growth in relation to plant age, soil fertility and light intensity 473

GEORGE H. WAGNER, GHIATH M. KASSIM and STEFAN MARTYNIUK, Nodulation of annual medicago by strains of *R. meliloti* in a commercial inoculant as influenced by soil phosphorus and pH 81

A. WALLACE, E. M. ROMNEY and G. V. ALEXANDER, Mineral composition of *Cuscuta nevadensis* Johnston (dodder) in relationship to its hosts 227

P. L. WATERHOUSE and S. W. BILLE, Comparison of the short term phosphate uptake by plants to the decrease in resin extractable phosphate in a cropped soil 67

D. W. WEST, Water use and sodium chloride uptake by apple trees I. The effect of non-uniform distribution of sodium chloride in the root zone 37

D. W. WEST, Water use and sodium chloride uptake by apple trees II. The response to soil oxygen deficiency 51

DAVID M. WILSON, STANLEY J. KAYS and BUD ETHERTON, The relationship between pathogenic fungal metabolites (fusaric and picolinic acid), endogenous ethylene evolution and the development of ethylene-like symptoms 355

HARRY W. YAWNEY, ALBERT L. LEAF and RAYMOND E. LEONARD, Nutrient content of throughfall and stemflow in fertilized and irrigated *Pinus resinosa* ait. stands 433
